Recombinant Human ANG
Catalog # C203
Derived from E.coli

DESCRIPTION
Recombinant Human Angiogenin is produced by our E.coli expression system and the target gene encoding Gln25-Pro147 is expressed.
Accession #: P03950
Known as: Angiogenin; Ribonuclease 5; RNase 5; ANG; RNASE5

FORMULATION
Lyophilized from a 0.2 μm filtered solution of 20mM PB, 150mM NaCl, pH 7.4.

SHIPPING
The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature listed below.

STORAGE
Lyophilized protein should be stored at < -20° C, though stable at room temperature for 3 weeks.
Reconstituted protein solution can be stored at 4-7° C for 2-7 days.
Aliquots of reconstituted samples are stable at < -20° C for 3 months.

RECONSTITUTION
Always centrifuge tubes before opening. Do not mix by vortex or pipetting.
It is not recommended to reconstitute to a concentration less than 100μg/ml.
Dissolve the lyophilized protein in distilled water.
Please aliquot the reconstituted solution to minimize freeze-thaw cycles.

QUALITY CONTROL
Purity: Greater than 95% as determined by reducing SDS-PAGE.
Endotoxin: Less than 0.1 ng/µg (1 IEU/µg).

AMINO ACID SEQUENCE
MQDNSRYTHFLTQHYDKPOQGRDDRYCESIIMRRRTSPCKDIHTFIHGNKRSIKAICENKNGPHRENLRISKSSFSQVTTCGLHGGSPWPPCQYRATAFRNVVACENGLPVLHDLQSFRRP

BACKGROUND
Angiogenin belongs to the pancreatic ribonuclease family. Angiogenin is primarily expressed in the liver. It may act as a tRNA-specific ribonuclease that abolishes protein synthesis by specifically hydrolyzing cellular tRNAs. Angiogenin is a potent stimulator of new blood vessel formation. And Angiogenin is endocytosed and translocated to the nucleus by binding to actin on the surface of endothelial cells. Angiogenic activity is regulated by interaction with RNH1 in vivo. In addition, Angiogenin is associated with susceptibility to amyotrophic lateral sclerosis, which is a degenerative disorder of motor neurons in the cortex, brain stem and spinal cord.
