**Antibody Expression**

Starting Material	Sequence My Antibody (minimum of 20,000 Hybridoma cells)
	Synthesize Antibody cDNA for Me My Antibody cDNA ( <i>Please attach vector map.</i> ) Gene Sequence: Vector Name: Mutagenesis ( <i>please provide sequence</i> ): My Expression Ready Construct ( <i>Please attach map and indicate cloning site.</i> ) Vector Name: Vector Sequence: Mutagenesis ( <i>please provide sequence</i> ):
Expression System	Bacteria <i>E. coli</i> Other: Yeast Baculovirus/Insect Mammalian Cells HEK293 CHO Other: Transient Transfection Stable Cell Line Has the gene been expressed in a host previously? Yes No <i>If yes, please provide us your protocol and experience in a separate word file.</i>
	Expression Scale Amount of Protein: mg Volume of Culture: liters
Comments	

**Antibody Purification**

QC Requirements	Purity:	%	Concentration:	
Protein Characterization	<i>SDS-PAGE, Concentration Determination, and Coomassie Blue are standard, please select additional below:</i>			
	Silver Staining		Native-PAGE	Mass Spec
	Western Blot		ELISA	Bioactivity Assay
	Endotoxin:	IEU/μg	HPLC	N-Terminal Sequence
